

Field Visits, June and July 2010

The Climarice II team will visit the pilot sites in Krishna and Cauvery basins from 26.06 to 10.07.10.

The team will interact with farmers, women self help groups, local officials of the Department of Agriculture and Water Resources and explore possibilities for involving them in adaptation field trials. Currently, a number of baseline (environmental, social and economic) indicators are being developed in the selected pilot villages in the two basins to improve the adaptive capacity of the local communities. Field trials on crop water use measurements, soil nutrient management, rice varietal performance, rice planting methods, etc, are being initiated in selected pilot villages.
