

Project planning meetings

Bioforsk and ClimaViet project partner Cuu Long Delta Rice Research Institute (CLRRI) met with stakeholders on November 18th.

Đôn Xuân Commune, Tra Vinh Province, November 18th: Bioforsk, together with project partner Cuu Long Delta Rice Research Institute (CLRRI) met with stakeholders at province-, district- and commune level authorities to discuss climate change adaptation needs. Priorities at the commune level for climate change adaptation are (1) drought and (2) salinity. Due to the elevated terrain in this area, water has to be lifted by pumping in Đôn Xuân commune.
